

Rangers Program – Pre-Program Self-Assessment

Instructions

Rate yourself from 1 (strongly disagree) to 5 (strongly agree) for each statement.
Use this as an honest baseline; it is not a performance review.

Communication

1. I can explain complex technical issues in a way that senior non-technical stakeholders understand.
2. In high-pressure situations, I communicate clearly and concisely instead of rambling.
3. I actively listen and check for understanding before responding.

Decision-Making

4. When information is incomplete, I can still make timely decisions instead of waiting for certainty.
5. I am comfortable prioritizing and saying "this comes first" when everything feels urgent.
6. I am willing to change my decision when new information clearly supports a better option.

Stress Management

7. Under pressure, I remain composed and avoid visibly panicking or shutting down.
8. I have specific techniques (breathing, taking a short pause, mental checklist) that I use to stay grounded.
9. After a tough incident, I have ways to recover my energy and reflect, rather than just moving on.

Leadership

10. In incidents, I naturally step up to coordinate people and tasks when needed.
11. I take ownership for outcomes instead of blaming other teams or circumstances.
12. I make sure others feel heard, even when I need to make a hard call.

Open Questions

A. Describe one incident where you are proud of how you performed under pressure. What did you do?

B. Describe one incident where you wish you had handled things differently. What would you change now?

C. What do you most want to improve about how you operate in high-severity incidents?
